

Seduction BY SISLEY

Sisley is one of the world's premium luxury cosmetics and skincare brands. With the launch of Phyto-Teint Eclat and Phyto-Poudre, the two become one.
By Alexandra Kohut-Cole

Colour is of paramount importance to French cosmetic brand Sisley. Add to that a blend of quality texture, formula and targeted skincare solutions for every skin type with a canny ability to translate this into their make-up line and the result is make-up with exceptional skincare properties.

WHAT'S NEW?

Phyto-Teint Eclat, the new powder foundation, fuses with the skin, transforming its appearance as if it were a sheer, transparent veil. The formula has staying power yet creates a radiant, glowing, natural look, invisibly settling on the skin's surface. Foundation coverage combines with sheer powder resulting in a luminously

silky complexion and long-lasting soft-focus effect as the light is reflected away from fine lines and signs of fatigue, at the same time mattifying the face and concealing any imperfections. A creamy, velvety appearance with long-lasting coverage is obtained instantly. Sweet almond oil, rose wax, extracts of mallow, gardenia and linden work to protect the skin.

The Phyto-Poudre Compacte gives a transparent, luminous sheer coverage that enhances the complexion. It also minimises the appearance of minor flaws and works to absorb excess sebum, although the skin is kept hydrated with the blend of camellia oil and mallow and linden extracts.

COLOUR ME BEAUTIFUL

The Munsell colour system used by image consultant and colour analysis company,

Colour Me Beautiful, is the method that Sisley adheres to when it comes to colour choice. Colours that work best on a person can be determined by gauging hair and eye colour and skin tone. To explain this further, image consultants Eve Roth Lindsay & Liz Kennedy from Colour Me Beautiful recommend how to work it with Sisley below. Their motto? "You will know when you've got it right when you notice you more than the colour."

COOL DUDES

Cool complexions have pink undertones in the skin and either very black or ash-blond hair with black, dark brown or blue-grey eyes. Colours such as Orchid, blue and amethyst will look best on you and make sure you wear silver jewellery. Many of the following recommended colours come from Sisley's newest collection,

Baroque Chic, as it contains the rich shades of purple that look fabulous with cool-toned complexions.

Pucker up: For day: Wear Phyto Lip Shine in Sheer Baby. For night: Sheer Plum is a good darker shade that works well from day to night.

Breathe: Phyto-Teint Eclat Compact in Vanilla is not too pink and not too orange as a foundation colour.

Lift: Apply Phyto Blush Eclat in Duo Rose to the apples of the cheeks.

Sparkle: Shades of vanilla, sorbet, burgundy and stardust make a beautiful combination. Line the eyes with Kohl Perfect Style in purple and finish by richly coating the lashes with Plum mascara.

WARM PEOPLE

A warm complexion is an olive one with golden tones and shades of deep brown, red or ginger in the hair. Colours such as salmon, olive green or rust will look great on you, as will gold jewellery.

Pucker up: Any cosmetic in coral can brighten up the face as the key for this complexion is a balance of pink and warm

"...A continuation of skincare, yet with colours and seduction." – Nicolas Chesnier, Sisley's Regional managing director, Asia Pacific

orange hues. For day, try long-lasting lipstick in Petale with Phyto-Lip Shine in Sheer Coral for a touch of colour. For night, switch to a long-lasting lipstick in Beige Tawny.

Breathe: Phyto-Teint Eclat Compact foundation in Soft Beige will bring out the golden undertones in your skin.

Lift: Brush Duo Peach on the tops of cheeks to lift and brighten the whole face.

Sparkle: Dust Sisley's Banana shadow over the eye and blend Jungle and Toffee on the lid and crease. To make your eyes really pop, dab Mango on the inner eyelid. Layer Deep Jungle liner on the lash-line and finish with mascara in Deep Brown. ■
